

List of Contents

NUMBER 1

The dynamics and control of large space structures after the onset of thermal shock	
P. M. Bainum, N. Hamsath and R. Krishna	1
Structural design and decoupled control	
Robert A. Calico and Franklin E. Eastep	9
Optimization of the rocket-powered ascent of Hotol	
M. Noton and G. G. Swinerd	17
ERS-1 active microwave instrumentation design and performance status	
D. J. Q. Carter	27
Onboard large-scale monolithic IC switch matrix for multibeam communications satellites	
Katsuhiko Araki, Masayoshi Tanaka and Haruhiko Kato	41
The ESA/MBB unfurlable mesh antenna development for mobile services	
H. Kellermeier, H. Vorbrugg, K. Pontoppidan and D. C. G. Eaton	47
Estimating rainfall and biomass for the pastureland zone of the West African Sahel	
J. B. Stewart, E. C. Barrett, J. R. Milford, J. C. Taylor and B. K. Wyatt	57
Sänger II, an advanced launcher system for Europe	
D. E. Koelle and H. Kuczera	63
Concept studies for a laser powered orbital transfer vehicle	
Alan Bond, Anthony R. Martin and Robert A. Bond	73
Costs and benefits of future heavy space freighters	
H. Arend	87
 <i>ACADEMY TRANSACTIONS NOTES</i>	
Evolution of servicing of orbital and expeditionary systems	
William L. Smith	93
Heat transfer design of an electrophoresis experiment	
M. J. Clifton and O. Marsal	99
 <i>EX MUNDO ASTRONAUTICO</i>	
Statutes of the International Academy of Astronautics	105

NUMBER 2

Optimal explicit guidance for three-dimensional launch trajectory	
S. K. Sinha, S. K. Shrivastava, M. S. Bhat and K. S. Prabhu	115
Dynamics and control during slewing maneuvers	
H. W. Mah, V. J. Modi, Y. Morita and H. Yokota	125
Dynamics and control of the tethered satellite system in the presence of offsets	
P. K. Lakshmanan, V. J. Modi and A. K. Misra	145
Recent advances in structural dynamics of large space structures	
Larry D. Pinson	161
From HF radio to unified S-band: an historical review of the development of communications in the Space Age	
David E. B. Wilkins	171
Launch cost analyses for reusable space transportation systems (Sänger II)	
Dietrich E. Koelle	191
<i>EX MUNDO ASTRONAUTICO</i>	
List of Reviewers	199
Announcements	200

NUMBER 3

Planar librations of a gravity-oriented satellite under the influence of solar radiation pressure	
V. V. Beletsky and E. L. Starostin	201
The development status of the UK-10 and UK-25 ion thruster systems	
D. G. Fearn, A. R. Martin and A. Bond	215
Space applications for disaster mitigation and management	
David Carter, Gloria W. Heath, Geir Hovmork and Hartmut Sax	229
Hermes safety and rescue	
H. Baccini, J. Charles, J. Colrat, J. F. Georges, J. Marcoux and J. Herholz	251
Satellite procurement strategy cost and risk considerations	
Preston Vorlicek and Mark Carlozzi	259
The maximization of the productivity of aquatic plants for use in controlled ecological life support systems (CELSS)	
B. G. Thompson	269
<i>EX MUNDO ASTRONAUTICO</i>	
Statement of IAA to COSPAR Open Plenary	
George E. Mueller	275
The Royal Swedish Academy of Sciences	277
In Memoriam—Eugène Pépin	
I. H. Ph. Diederiks-Verschoor	279

In Memoriam—Giuseppe Gabrielli

Rodolfo Monti 279

In Memoriam—Renato Bofifacio

Ernesto Vallerani 280

NUMBER 4**Earth oblateness effect on the optimal impulsive transfer between close orbits.****Part 1: nonsingular solutions**

Sandro da Silva Fernandes and Rodolpho Vilhena de Moraes 281

Attitude stability of rigid satellites via a normalized Hamiltonian

S. R. Marandi and V. J. Modi 287

State estimation for solid apogee motor burning of geostationary satellite

Shuji Ono, Kiyoshi Tomomura and Toshihiro Toyoda 301

Low-cost launch system and orbital fuel depot

Jerome Pearson 315

Investigation of very high energy rockets for future SSTO vehicles

H. D. Froning Jr 321

Performance capabilities of a space-power liquid metal MHD converter

R. Laborde, A. Alemany and F. Werkoff 331

Inter-orbital link with optical technologies: towards a reliable transmitter

B. Jarrousse, X. Henrion and J. C. Anne 341

Mineralization of human bone tissue under hypokinesia and physical exercise with calcium supplements

Yan G. Zorbas, Grigori E. Verentsov and Nikolai I. Abratov 347

Analysis of an algae-based CELSS. Part 1: model developmentMark T. Holtzapple, Frank E. Little, Merry E. Makela
and C. O. Patterson 353**Analysis of an algae-based CELSS. Part 2: options and weight analysis**Mark T. Holtzapple, Frank E. Little, William M. Moses
and C. O. Patterson 365**NUMBER 5****A dynamical study of the proposed Space Station type configuration**

V. J. Modi and A. Suleman 377

Earth oblateness effect on the optimal impulsive transfer between close orbits.**Part 2: singular solutions**

Sandro da Silva Fernandes 393

Optimal low-thrust limited power transfer between neighbouring quasi-circular orbits of small inclinations around an oblate planet

Sandro da Silva Fernandes and Wagner Sessin 401

Axisymmetric bubble profiles in a slowly rotating helium dewar under low and microgravity environments	
R. J. Hung, Y. D. Tsao, B. B. Hong and Fred W. Leslie	411
Geology-oriented module for orbital Space Station	
V. V. Ezhkov, V. V. Kozlov and N. V. Mezhelovski	427
Hermes system: preliminary telecommunications architecture system	
J. Clevers, B. Curbelié and X. Henrion	431
Servicing of the future European stations/platforms through European means	
P. Eymar, Y. Peyrin, C. Cougnet, P. Brudieu and P. Dutto	439
Combined program of Mars exploration using automatic spacecraft	
V. M. Kovtunencko, R. S. Kremnev, G. N. Rogovsky and K. G. Sukhanov	451
Controlled ecological life support systems (CELSS) in high pressure environments	
B. G. Thompson	463

NUMBER 6/7

SPECIAL ISSUE
SPACE AND HUMANITY

*Selected papers presented at the
 39th Congress of the International Astronautical Federation
 Bangalore, India, 8-15 October 1988*

Telescience at the University of California, Berkeley	
S. Chakrabarti, W. T. Marchant, G. C. Kaplan, C. A. Dobson, J. G. Jernigan, M. L. Lampton and R. F. Malina	467
Integrated energy and media supply concepts for long-term space missions	
W. Schwarzott, G. Reich and W.-J. Denner	473
Ariane utilization for secondary payloads	
G. G. Reibaldi, M. Trischberger, G. Melchior and J. Breton	483
Radiation protection of astronauts in LEO	
G. Melkonian and J. Bourrieau	491
Comparison of SPOT, TM and MSS data for agricultural land-use mapping in Gujarat (India)	
Baldev Sahai, V. K. Dadhwal and M. Chakraborty	505
Aspects of the determination of ocean wave parameters by means of an optoelectronic satellite sensor	
H. Jahn, D. Oertel, R. Sandau and G. Zimmermann	513
IRIS-LAGEOS 2 mission	
R. Ibba, G. Rum, F. Varesio and L. Bussolino	521

On-orbit experiment plan on solar thermodynamic power system	Nobuhiro Tanatsugu	529
A reappraisal of satellite orbit raising by electric propulsion	R. Holdaway, Y. S. Wong, A. R. Martin and P. M. Latham	535
Concept of inflatable elements supported by truss structure for reflector application	Sumio Kato, Yasuhiro Takeshita, Yoshinori Sakai, Osamu Muragishi, Yuzo Shibayama and Michihiro Natori	539
Explicit guidance of a rocket with non-uniform thrust	S. K. Sinha and S. K. Shrivastava	555
Dynamics of interconnected flexible members in the presence of environmental forces: a formulation with applications	V. J. Modi and A. C. Ng	561
Aerodynamic attitude stabilization for a small, low-orbiting, manoeuvrable satellite	Ralph D. Lorenz	573
Rapid slewing of the orbiting Spacecraft Control Laboratory Experiment (SCOLE) using LQR techniques	Cheick M. Diarra and Peter M. Bainum	577
Solid/liquid interface shape and Marangoni convection on a germanium float zone	M. Z. Saghir	585
The influence of buoyancy on the oscillatory thermocapillary convection with small Bond number	Wen-Rui Hu	593
Orbiting very long baseline interferometry (OVLBI) observations using the tracking and data relay satellite system (TDRSS) at 2.3 and 15 GHz	G. S. Levy, R. P. Linfield, C. D. Edwards, S. J. Di Nardo, J. S. Ulvestad, J. F. Jordan, L. Skjerve, L. R. Stavert, R. A. Preston, C. S. Christensen, N. A. Renzetti, B. F. Burke, J. W. Barrett, A. Whitney, R. J. Cappallo, A. E. E. Rogers, D. H. Roberts, D. L. Jauncey, C. H. Ottenhoff, K. B. Blaney, W. L. Peters, J. Reynolds, T. Nishimura, T. Takano, T. Yamada, T. Hayashi, H. Hirabayshi, M. Morimoto, M. Inoue, T. Shiomi, H. Kunimori, N. Kawaguchi, J. Amagai, M. Balister and M. Pospieszalsi	597
Design and development of the Engineering Test Satellite-VI	K. Nakamaru, H. Mitsuma, H. Kitahara, T. Katagi, K. Ito, Y. Yamamoto, Y. Inada, M. Suenaga and R. Uchida	603
Predicting the velocity and azimuth of fragments generated by the range destruction or random failure of rocket casings and tankage	M. Eck and M. Mukunda	617
Congreve and Toulouse	J.-P. Escalettes and Ph. Jung	631

NUMBER 8

Forbidden tangential orbit transfers between intersecting Keplerian orbits	Rowland E. Burns	649
State observation and variable structure control of rotational maneuvers of a flexible spacecraft	Zhi-Qiang Qu and Wei-Bing Gao	657
Numerical simulation of valveless pulsed combustors	J. A. Olorunmaiye and J. A. C. Kentfield	669
ISRO's solid rocket motors	R. Nagappa, M. R. Kurup and A. E. Muthunayagam	681
An efficient method for the computation of static meniscus configurations	R. M. S. M. Schulkes and C. Cuvelier	699
Thermal and structural analysis of Hermes	C. Petiau	707
The EUTELSAT II satellites: Europe's seeds in communication and TV distribution game	C. Burgio, J. L. Soula and J. J. Dumesnil	717
ACADEMY TRANSACTIONS NOTE		
Space launcher development: a critical view	H. O. Ruppe	729
EX MUNDO ASTRONAUTICO		
In Memoriam—Valentin Petrovich Glushko	G. I. Kharitonov	731

NUMBER 9

SPECIAL ISSUE

BENEFITS TO SOCIETY FROM SPACE ACTIVITIES

*A selection of papers presented at the
39th Congress of the International Astronautical Federation
Bangalore, India, 8-15 October 1988*

Foreword	N. Jasentuliyana	733
Opening Remarks	Stephen Gorove	735
Space benefits: roles of developing countries	F. Shahrokhi and K. E. Harwell	737
Economic benefits of commercial space activities	Barbara A. Stone	743

Benefits to society from space exploration and use	Stephen E. Doyle	749
Influence of space exploration on the development of mankind	Alla G. Massevitch	755
Relevance of space activities to society	Salim Mehmud	759
Benefits from out of this world	Amit K. Maitra	763
Societal benefits of space technology	Kiran Karnik	771
Revaluation of the concept of the human condition and the common heritage of mankind: keys to the social benefits of space technology	Aldo Armando Cocca	779
Highlights of the Discussion	Rapporteur, Kiran Karnik	785

NUMBER 10

Asymptotic behaviour and boundedness of linear systems with time varying coefficients	S. Pradeep and S. K. Shrivastava	787
Derivation of European satellite equipment test specifications from vibro-acoustic test data	A. Girard, J. F. Imbert and D. Moreau	797
Photovoltaics for high capacity space power systems	Dennis J. Flood	805
Robotic vision technology and algorithms for space applications	Kumar Krishen	813
Telerobotics and orbital laboratories: an end-to-end analysis and demonstration	Carl R. Konkel and Craig F. Miller	827
The joint DoD/NASA Advanced Launch System: pathway to low-cost, highly operable space transportation	Malcolm G. Wolfe	835
Mars exploration: balloons and penetrators	V. A. Vorontsov, R. S. Kremnev, K. M. Pichkhadze and G. N. Rogovsky	843
ACADEMY TRANSACTIONS NOTES		
Global land-surface primary productivity based upon Nimbus-7 37 GHz data	B. J. Choudhury	847
Processing synthetic aperture radar at CNES	D. Massonnet	851

NUMBER 11

SETI—THE SEARCH FOR EXTRATERRESTRIAL INTELLIGENCE

*A Selection of Papers from Past
International Academy of Astronautics Symposia*

Introduction

Space: 30 years into the future

James C. Fletcher 855

The Origin and Evolution of Life in the Universe

Origin and evolution of planetary systems

T. V. Ruzmaikina 859

The evolution of complex life

John Billingham 863

The flow of energy, natural learning systems and the creation of life on Earth

John B. Corliss 869

Development of extraterrestrial intelligence and physical laws

V. S. Troitskij 875

Threats to CETI-SETI: possible solutions and anthropic principle

M. Subotowicz 889

Toward a multi-path approach for SETI

Michael D. Papagiannis 897

SETI: Science, Search Strategies and Technology

Small duty cycles in SETI

Georg M. Gruber and Jorg Pfeiderer 903

Radio frequency interference at Jodrell Bank Observatory within the protected 21 cm band

Jill Tarter 907

An asymmetric shaped mirror system for the Arecibo telescope, and its uses for SETI

Sebastian von Hoerner 913

Analysis of a crossed Bragg cell acousto-optical spectrometer for SETI

Samuel Gulkis 919

VLSI processors for signal detection in SETI

J. F. Duluk, I. R. Linscott, A. M. Peterson, J. Burr, B. Ekroot
and J. Twicken 927

NUMBER 12

- Optimal low-thrust transfer between neighbouring quasi-circular orbits around an oblate planet**
Sandro da Silva Fernandes 933
- Nutation damping of spinning satellite with viscous annular dampers**
Jia-Zhen Hong 939
- Microgravity measurement assembly (MMA) for Spacelab module missions**
D. Eilers, I. Gerhard, B. Hofer, F. Rudolf and W. Brungs 947
- Ariane transfer vehicle in service of man in orbit**
N. Deutscher, K. Schefold and C. Cougnet 957
- Production possibility frontiers for a *cis*-lunar transportation system**
Kent L. Miller 969
- Moments applied in the manual assembly of space structures: EASE biomechanics results from STS-61B**
D. Cousins and D. L. Akin 973
- ACADEMY TRANSACTIONS NOTE**
A study on thin walled intersecting spheres
J. A. Carvalho Jr and D. Bastos-Netto 981
- EX MUNDO ASTRONAUTICO**
In Memoriam—John H. Disher
Robert F. Freitag 987
